

Display

Where will this information be viewed?

Grubhub exists (but is bad) [lies to you]

Concise menus for restaurants and food options

Displays all eatery locations based on proximity or other aspect of location

Ease of Access

Easy to track dining entrance, but hard to track exit.

Mobile app for convenience?

Could be connected to Carolina card to show remaining cash.

Timing

Add time it takes to walk to the place

Too many variables to get an accurate time?

Accounting for local construction/road closures?

Needs to be updated frequently

View of Items in Relation to Each Other

Maps?

interconnectedness for all aspects of campus

Styling

Theme

Color-coded for wait times (red=busy)

Colors should apply for getting to location as well as obtaining food

Information

Will someone be in charge of this information, will it be a guess, or something else?

How will more accurate info be obtained?

Info should be USC specific (not like other featured apps)

Shows meal swipes
